18. New Features of Microsoft Windows Server 2012 (120 minutes)

Come learn with the experts the technical and professional elements about Active Directory in Windows 2008 and 2012- Installation, configuration, and administration of such systems.

Aim: After completing this course, you will be ready to attempt Microsoft Paper 70 – 640 (Configuring Microsoft Windows Server 2008 Active Directory).

The course will be conducted in the evening hours (16:00 – 19:30) from Monday to Friday. Saturday can be utilized for extra practices for those who will have time.

The course consumes almost 40 hours. This means for 2 or 3 hours a day, it will be conducted for 20 days for 2 hours per day or 14 days for 3 hours per day.

Note*: if you would need in full time basis, please indicate, so that we can arrange for you and it will only be for one week with 8 hrs per day which is convenient for those coming from out of Arusha region but it will be in March/April*
Target group
The course is geared toward people who have basics of networking and computer maintenance and are in need of enhancing their skills and knowledge to become System/Network Administrators/system analyst and even system managers.
